Georgia State Board of Entomology,

ATLANTA, GA.

OFFICIAL CERTIFICATE.

No. 3.

To whom it may concern:

THIS IS TO CERTIFY, That, in accordance with an Act of Assembly approved December 20, 1898, I have on the 17th and 18th of August, 1900, made an inspection of the Willow Lake Nurseries of SAMUEL H. RUMPH, Proprietor, at Marshallville, Ga., and that I have found the stock in these nurseries apparently free from the San Jose Scale and all other insects and diseases of a seriously injurious nature. Fumigation and other precautionary measures against dangerous pests are adopted on these premises.

This Certificate is to cover only stock grown in the above named nurseries, and becomes invalid twelve months from date.

(Signed)

W. M. SCOTT,

State Entomologist.

PREFACE.

N PRESENTING to our customers and the public this edition of our *Descriptive Catalogue of Fruits*, we sincerely thank you for the liberal patronage that you have bestowed upon us in the past, and earnestly solicit a continuance of the same in the future.

Being a member of the "American Promological" and the "Georgia Horticultural" Societies, and also very largely interested in Fruit growing for market since 1879, and having tested a great many varieties, we are now enabled to offer to the Southern Fruit Grower our stock of selected varieties, such as, we think, cannot fail to give general satisfaction.

We do not claim to offer better trees than can be grown elsewhere, but in growing them our object is to produce first-class stock, and such varieties as are adapted to the Southern climate.

Our terms and prices will be found as reasonable as those of any other first-class Nursery in the South, and we hope by receiving a liberal patronage from our friends to greatly further the interest of Fruit Growing. Orders should be sent in early, so as to secure the best varieties; besides, it is preferable to transplant as soon after the first killing frost as practicable, as the roots of the tree grow all during the winter months, thereby insuring greater success.

We sell our stock and warrant it true to name, with the express understanding and agreement that should any not prove true to name, we will refund the money paid or replace the trees, vines or plants with others that are true, but are not liable for damages other than are herein named.

Trees will be securely packed and delivered at Railroad Depot in Marshallville, Georgia, free of charge, purchasers incurring all risk after such delivery.

Write your orders upon a separate list, giving plain and particular directions for marking and shipping. State whether you wish them shipped by Express or Freight.

CLAIMS.—All claims for errors must be made upon receipt of stock. We desire to be informed at once of any errors that may occur, in order to rectify the same without delay.

TERMS.—Terms, cash with order, or C. O. D. by Express. Remittances may be made either by Express, Check on New York, or Macon, Ga., payable to our order, or small amounts can be sent by Registered Letter or Post-office order.

SAMUEL H. RUMPH,
Marshallville, Ga.

HINTS FOR TRANSPLANTING.

The great requisite for success in this is the preparation of the soil and the pruning of the trees before planting. The ground should be thoroughly broken up by deep ploughing, and the holes dug from two to three feet wide and one and a half to two feet deep. A few shovels full of stable manure, top soil and wood ashes, well composted and thoroughly mixed with the earth in filling the holes, adds greatly to the vigor of the tree.

Care must be taken in cutting off all the broken roots from the tree with a smooth, upward cut, then place it in the hole the depth that it grew in the Nursery, spreading out the roots to their natural position, filling in the earth to a level with the surface, and pressing it firmly around the roots of the tree with the foot. When this is done, the tree should be drawn up several inches, so as to give the roots a downward tendency. A sufficient quantity of earth must be thrown around the tree to allow for settling, and to prevent the water from collecting and souring around the roots of the tree.

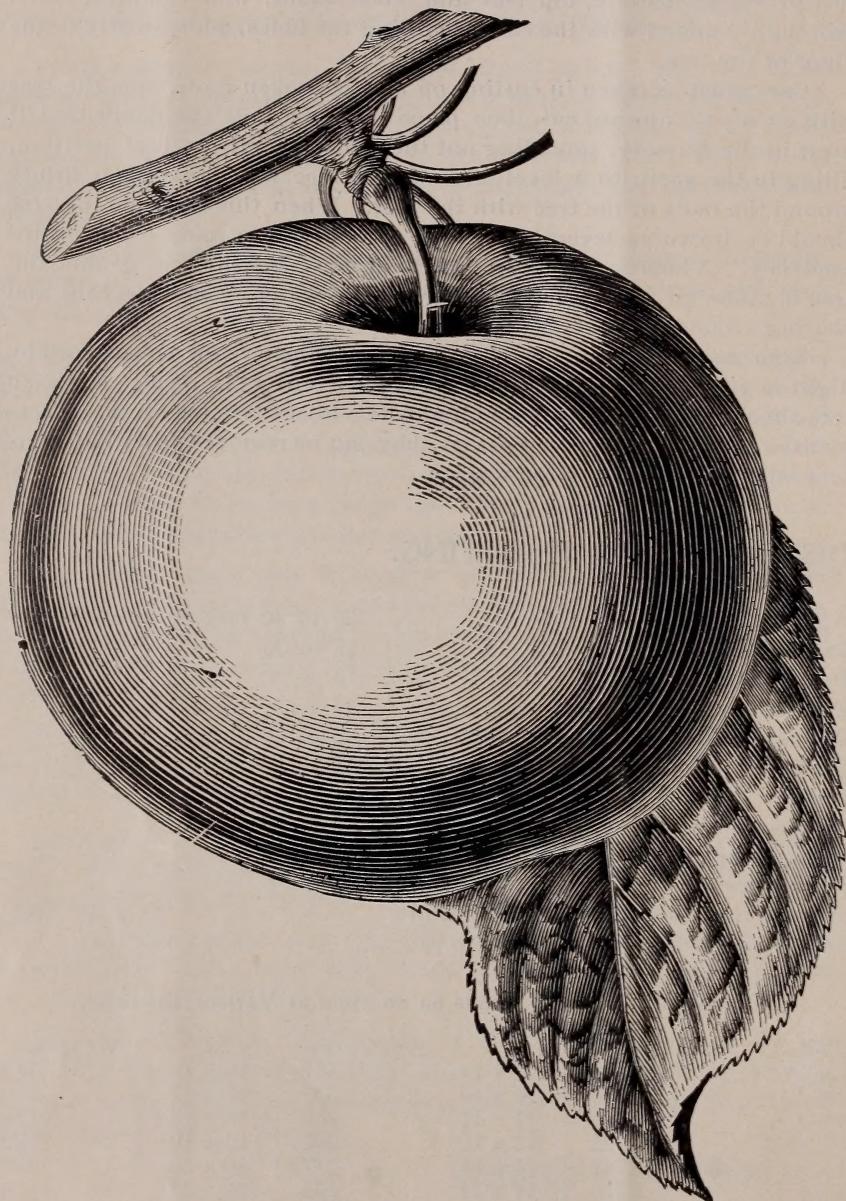

Shorten in the branches in proportion to the loss of roots caused by digging for removal. All branches, from a one-year Apple or Peach tree should be taken, leaving a single stem about two feet high. Trees planted at this age succeed best, as they can be removed from the Nursery with less damage to the roots.

ASTRACHAN RED APPLE.

APPLES.

The most reliable and extensively cultivated of all fruit. It produces abundant crops every alternate year, and by thinning the fruit the year of heavy bearing, a fair crop may be expected yearly. It succeeds well in most any soil, but flourishes best in a sandy loam, with clay subsoil. Lime or wood ashes should be applied around the roots of apple trees where the land is deficient of these constituents.

All winter varieties mature here in October and November, and require delicate handling when gathered. To keep well they should be pulled from the trees with the hand and placed in a cool cellar, free from frost, and very little or no light, as those exposed to light will shrivel.

PRICES OF APPLE TREES:

Standard Trees, two and three years old, 5 to 7 feet.....15 cents each.
\$1.50 per dozen, \$10.00 per 100, \$50.00 per 1,000.

Standard Trees, one year old, 4 to 6 feet.....15 cents each.
\$1.50 per dozen, \$10.00 per 100, \$50.00 per 1,000.

SELECT LIST—SUMMER VARIETIES.

ASTRACHAN RED—Large yellow, nearly covered with crimson, flesh tender, juicy, acid and pleasant; tree a splendid grower. This is the very best early apple, and we have had ripe specimens as early as May 15. They sell higher in market than any other early variety.

EARLY HARVEST—Above medium size, skin bright yellow; flesh juicy, crisp and well flavored; ripe June 10 to 20.

RED JUNE—Medium, conical, skin dark red; flesh white, tender and pleasant; ripe June 15 to July 15.

SIMMONS' RED—Medium, roundish, oblate, skin red with stripes of darker red; flesh yellow, very juicy, aromatic, and of fine flavor; tree a thrifty, compact grower, bears young and profusely. This is one of the best cider apples; ripe June 25, and continues for three months, which makes it very desirable. (New.)

HORSE—Large, roundish, skin yellow, slightly tinged with red in the sun; flesh yellow, acid and tender; ripe July 20,

AUTUMN VARIETIES.

TAUNTON—Large, roundish, conical, skin yellow with red cheek; flesh yellow, crisp and of good flavor; ripe September 1.

CARTER'S BLUE—Large, roundish, oblate, skin greenish, washed and striped with dull red and covered with a blue bloom; flesh yellow, crisp, rich, aromatic, very good; ripe September 15.

EQUINETELLE—Very large, oblate, skin bright yellow, with red cheeks and stripes of darker red; flesh rich, sub-acid and juicy; ripe September 25.

WINTER VARIETIES.

MANGUM—Medium, oblate, skin yellow, shaped and striped with red; flesh yellow, very tender, crisp and juicy, rich and aromatic; tree very prolific, luxuriant, and a compact grower; ripe October 1st and keeps until March.

SHOCKLEY—Medium, conical, skin yellow, overspread with bright crimson; flesh crisp, juicy, sweet and slightly vinous; tree very rapid and compact grower and early bearer, often bearing fruit the second year after transplanting; the most desirable winter variety for the South, where it not only bears regular and abundant crops, but keeps until June; a very profitable market variety; ripe October to June.

ROMANITE—Medium, roundish, conical, skin yellowish white and mostly covered with red; flesh yellow, juicy and pleasantly acid, very similar to the above variety; ripe October and keeps well.

NICKAJACK—Very large, roundish, skin striped and shaded with dull red; flesh yellow, tender, sub-acid and very good; ripe October to January.

STEVENSON'S WINTER—Medium, roundish, oblate, skin greenish yellow, shaded and striped with red; flesh yellow, juicy firm, sweet, aromatic and very pleasant; one of our best flavored and best keeping winter apples; bears very young and profusely; ripe November to June.

YATES—Small, oblate, skin greenish yellow, shaded and striped with red, with many light dots; flesh white, tender, juicy and good; ripe November to March.

BEN DAVIS—Large, roundish, conical, skin yellow with red cheek; flesh sub-acid and pleasant; ripe November to March.

HILEY'S EUREKA—Medium, roundish, oblate, skin yellow, shaded and striped with dull red; flesh very firm, crisp and acid; a chance seedling found in the woods on the place of Mr. Jacob Hiley, Macon county, Ga.; ripe November 15; keeps until May. (New.)

SHOCKLEY APPLE.

SNEED PEACH.

PEACHES

This fruit adapts itself to almost any soil, but does best in a sandy loam with red clay sub-soil, on land well drained, naturally or artificially. In selecting a site for an orchard a greater preference is shown to an elevated situation, as the fruit is less liable to be killed by Spring frosts, but where one is compelled to plant in a valley or low lands, it is advisable to select late blooming varieties. Take it in its fresh ripe state, and there is no fruit that so delights the eye or palate, and it not only appeals to the appetite, but is highly conducive to health. It is also excellent for culinary purposes, either canned or evaporated. As to its market value none exceed it.

PRICE OF PEACH TREES.

One year old, 4 to 5 feet high, single trees, 15c.; per dozen, \$1.50; per 100, \$10; per 1,000, \$50. 3 to 4 feet high, \$40 per 1,000.

One year old, 2 to 3 feet high, single trees, 10c.; per dozen, \$1.00; per 100, \$7.50; per 1,000, \$30.

SELECT LIST—FREESTONES.

SNEED—Fruit medium to large, skin yellowish white, almost covered with light red; flesh white, juicy and well flavored; tree a flat grower, with very large dark green foliage; ripe May 10 to 20.

EARLY ALEXANDER—Medium to large, skin red where exposed to the sun; flesh greenish white, juicy and sweet; very profitable, early variety for shipping; ripe May 15 to June 1.

TRIUMPH—Medium to large, skin yellowish red; flesh yellow, juicy and sweet; ripe June 1 to 10.

EARLY RIVERS—Very large, skin greenish white, with a very delicate pink cheek; flesh rich, melting, juicy and good; skin very thin and easily bruised; one of the finest peaches we have for home use; ripe June 5 to 15.

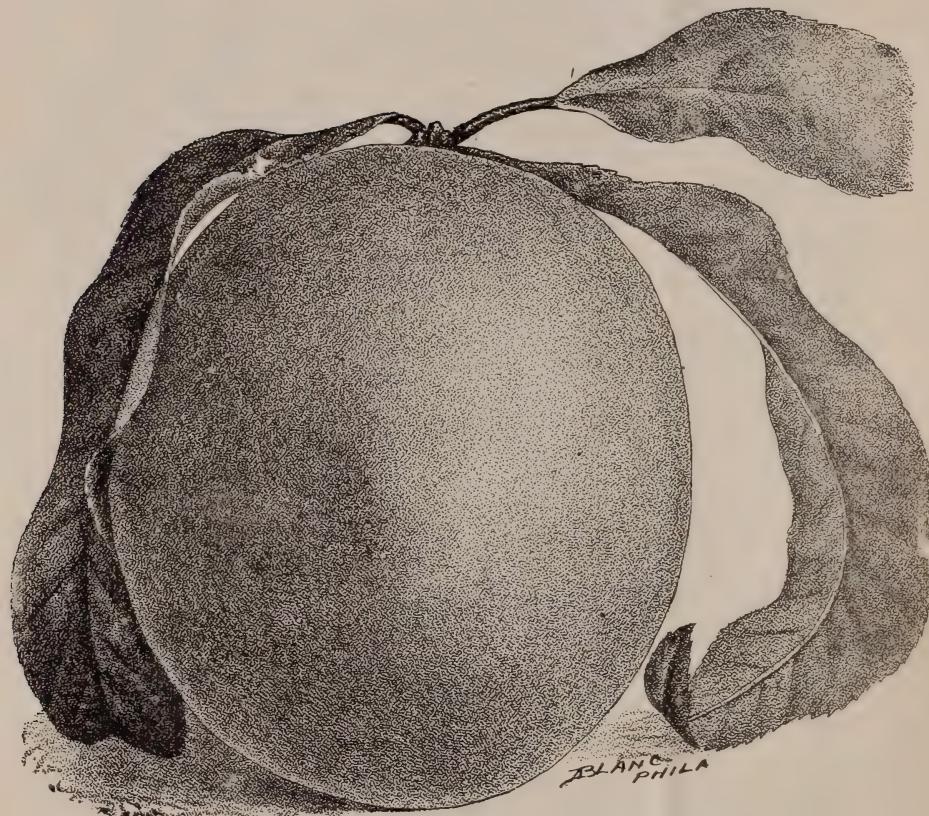

WADDELL—Medium size, skin greenish white, almost covered with red; flesh white, juicy and sweet; tree flat grower, very prolific and hardy; ripe June 5 to 15.

PANSY—Fruit medium to large, skin yellow, with dark red cheek; flesh yellow, juicy, rich and well flavored, very handsome indeed; ripe June 5 to 15.

RED RIVER—Fruit large, skin red where exposed to the sun; flesh juicy and sweet; excellent market variety; ripening June 10 to 20.

EARLY MICHIGAN—Fruit large size, skin greenish white, nearly covered with dark red; flesh white, melting, juicy and good; very hardy and prolific bearer; ripe June 15 to July 1.

EARLY TILLOTSON—Medium, skin yellowish white and nearly covered with red, darkening on the sunny side; it is a good market variety; ripe June 15 to July 1.

BELLE PEACH.

CARMAN—Fruit very large, skin creamy white shaded with crimson where exposed to the sun ; flesh white, juicy and good ; tree good grower and prolific bearer, profitable market variety ; ripe June 20 to July 1.

MOUNTAIN ROSE—Medium, skin white, clouded with red ; flesh juicy, vinous ; very good ; ripe June 25.

HILEY—Claimed to be a seedling of Belle, about same size, skin almost covered with red ; flesh white ; originated by Mr. Eugene Hiley, Marshallville, Ga. ; ripe June 25 to July 5.

LADY INGOLD—Very large, skin yellow, with dark red cheek ; flesh yellow, fine grain and well flavored ; a very desirable market peach ; ripe June 25 to July 5.

ROBERTA—Fruit very large, skin golden yellow with red cheek ; flesh yellow and well flavored ; originated by Mr. A. B. Slaphey, Marshallville, Ga. ; ripe July 1 to 10.

BELLE—Very large, skin white, with red cheek ; flesh white, firm, and of excellent flavor ; the fruit uniformly large and snowy ; tree a rapid grower and very prolific. A seedling of Chinese Cling, originated by Mr. Lewis A. Rumph, Marshallville, Ga. Ripe July 1 to 15. (New.)

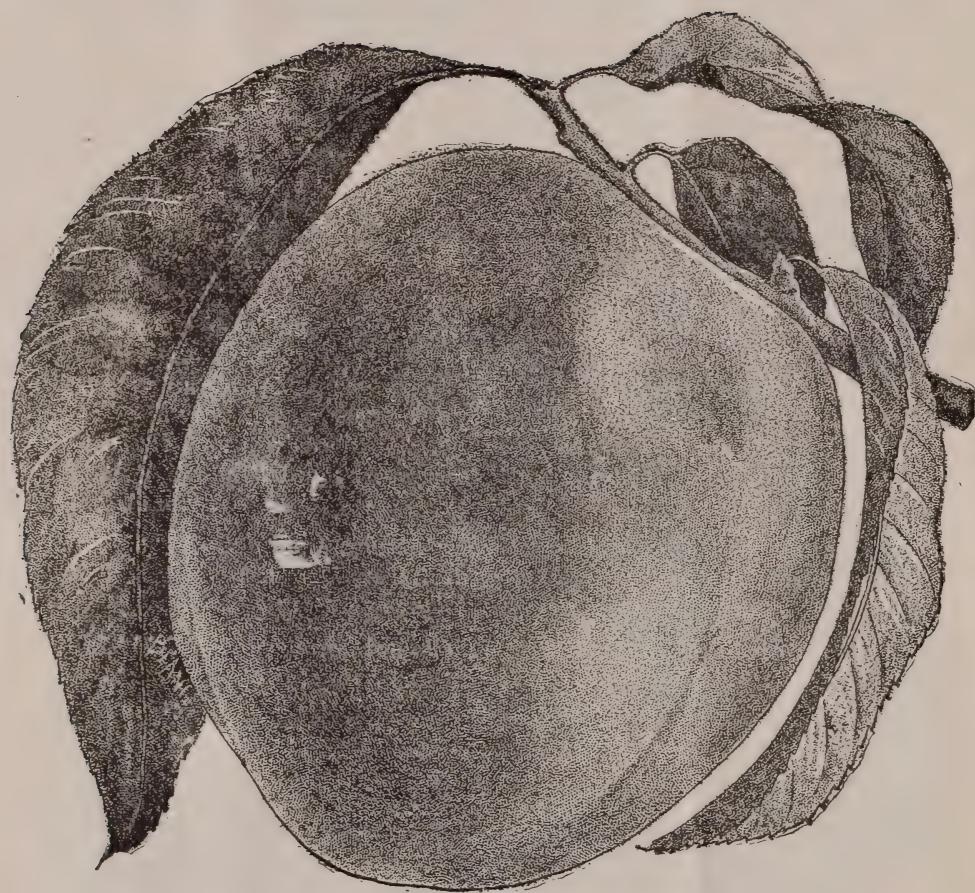

THURBER—A seedling of Chinese Cling, which it resembles in size and color, but is more delicate and highly flavored ; originated by Mr. P. J. Berckmans, Augusta, Ga. ; ripe July 5 to 15.

CHINESE FREE—Large, oblong, skin white, with red cheek ; flesh red, firm, and well flavored ; free from rot, which makes it a very desirable market variety ; ripe July 5 to 15.

CRAWFORD'S EARLY—Large, oblong, skin yellow, with red cheek ; flesh yellow, melting, sweet and rich ; ripe July 5 to 15. This is one of the very best Summer varieties for shipping to the Northern markets.

ELBERTA—Very large, skin golden yellow, where exposed to the sun ; faintly striped with red ; flesh yellow, very fine grain, juicy rich, sweet and splendidly flavored ; tree very prolific and presents a handsome appearance, and a more luxuriant growth than the "Chinese Cling," from which it is a seedling. It is a perfect free-stone, and one of the most successful market varieties, selling uniformly at higher prices than any other Peach ; ripens July 10 to 20.

CRAWFORD'S LATE—Much larger than "Crawford's Early," though it resembles it in shape, color and quality, and ripens about ten or fifteen days later ; one of the leading market varieties.

ELBERTA PEACH.

STUMP THE WORLD—Very large, roundish, skin creamy white, with red cheek ; flesh white, juicy and good ; ripe July 20 to 25.

ANNIE ROSS—Fruit very large, skin yellow, with red cheek ; flesh yellow, juicy and well flavored ; ripe July 20 to August 1.

EMMA—Fruit very large, skin golden yellow, with red cheek ; flesh yellow, fine grain, firm, juicy and highly flavored ; tree luxuriant grower and quite prolific ; a perfect freestone ; one of our most attractive and profitable market varieties ; ripe July 25 to August 5.

SALWAY—Very large, skin golden yellow ; flesh yellow, very firm, rich and sweet ; one of the best late varieties for this section ; ripe August 10 to 20.

EVA—Very large, skin yellow, with red cheek on sunny side ; flesh yellow, firm and good ; originated by Judge J. A. Edwards, Marshallville, Ga. ; ripe August 10 to 20.

BALDWIN'S LATE—Medium, roundish, oblong, skin greenish white, with a pale red cheek ; flesh firm, juicy, melting and well flavored ; ripe October 5 to 25.

HAMILTON'S LATE—Fruit large, skin creamy white with red cheek ; flesh white, juicy and good ; originated by Mr. A. J. Hamilton, Marshallville, Ga. ; ripe October 5 to 25.

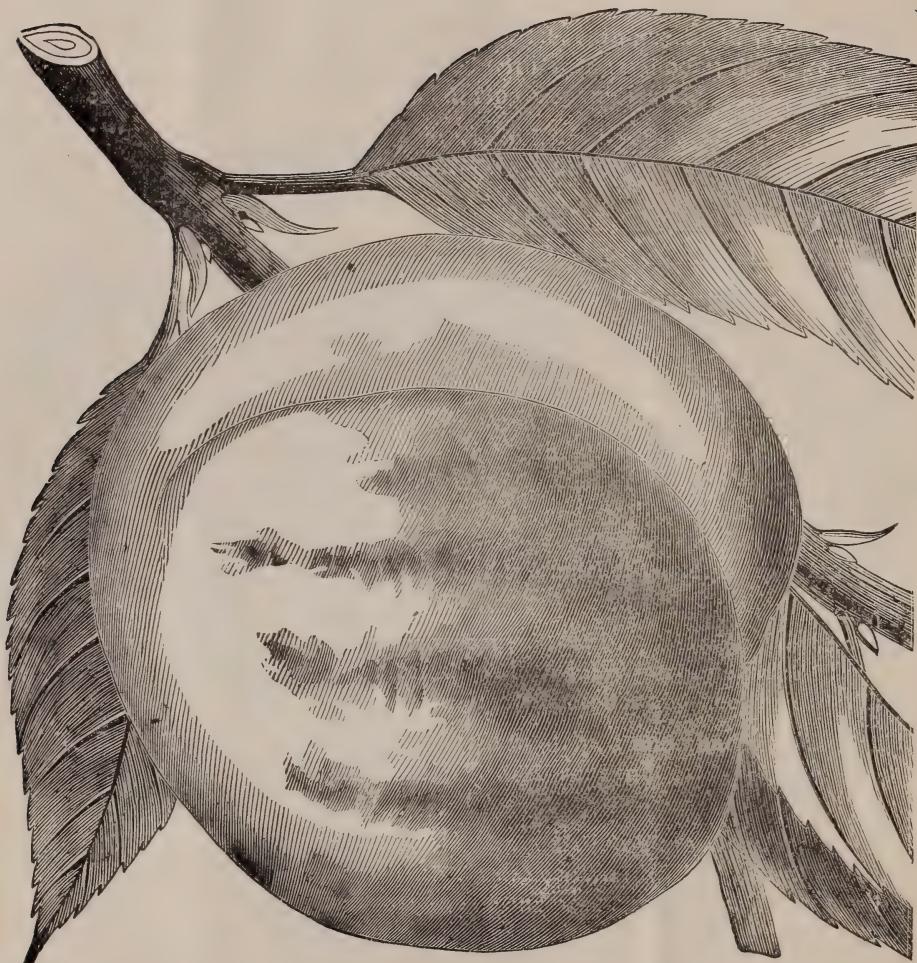

CLINGSTONES.

GENERAL LEE—Very large, skin creamy white, shaded with red ; flesh juicy, of high flavor ; good market variety ; ripe July 5 to 15.

PLANT'S CLING—Very large, skin yellow, almost covered with dark red ; flesh yellow, juicy, rich and sweet ; very desirable indeed for family use ; ripe July 20 to August 5.

JONES' CLING—Fruit very large, skin golden yellow, and where exposed to the sun faintly striped with red ; flesh yellow, juicy, rich and sweet ; ripe August 5 to 15.

EATON'S GOLDEN—Very large, round, skin golden yellow ; flesh yellow, very sweet, juicy and rich ; one of the best Fall varieties of clingstones ; ripe September 15 to 25.

EMMA PEACH.

Select list of 12 varieties best adapted to shipping in their fresh state to Northern and Western markets—

in order of maturity :

TRIUMPH,	EARLY TILLOTSON,	LADY INGOLD;
WADDELL,	CARMAN,	BELLE,
PANSY,	MOUNTAIN ROSE,	ELBERTA,
RED RIVER,	HILEY,	EMMA.

Select list of 12 varieties best adapted to Canning and Evaporating in order of maturity :

Select list of 12 varieties best adapted to Southern Georgia and Florida—in order of maturity :

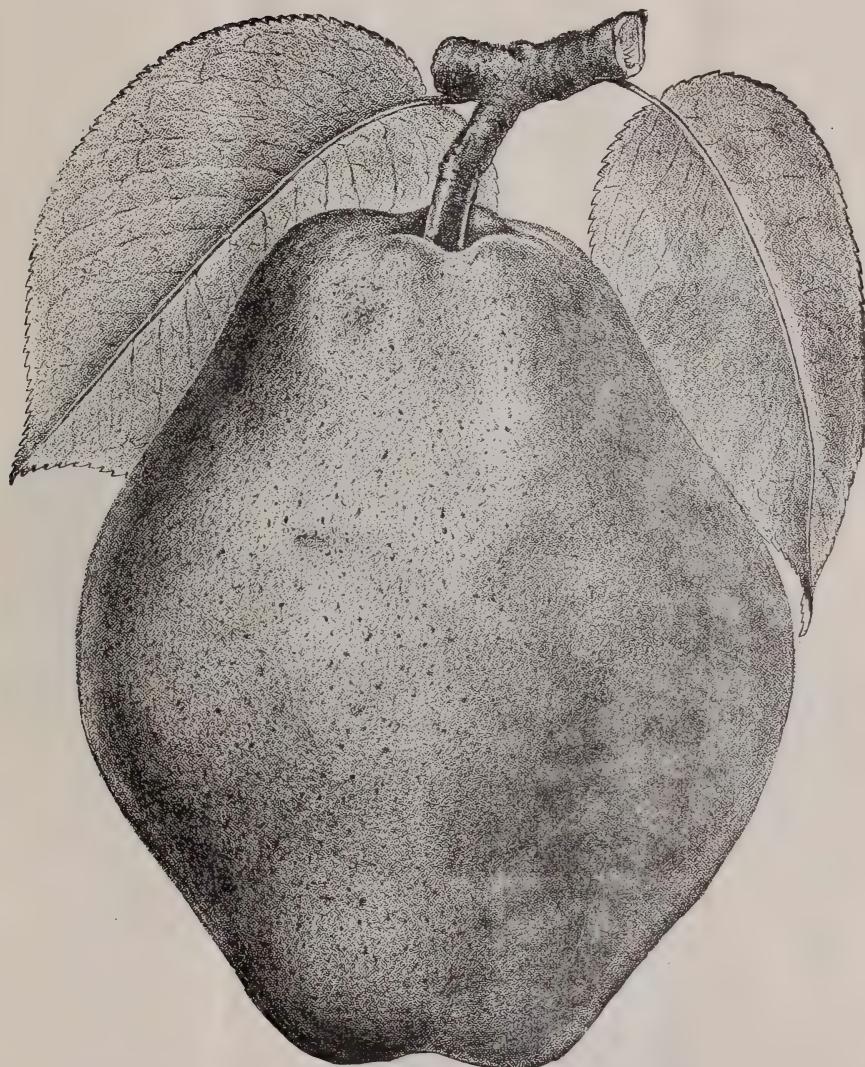

SNEED,	EARLY TILLOTSON,	BELLE,
EARLY ALEXANDER,	RED RIVER,	GENERAL LEE,
EARLY RIVERS,	CARMAN,	THURBER,
WADDELL,	HILEY,	ELBERTA.

LECONTE PEAR.

Fruit large, skin greenish yellow, flesh white and melting, quality medium, excellent for evaporating and canning. It is noted for its productiveness, rapid growth, and almost freedom from blight. This fruit is being planted largely in the Southern States for market. Ripens July 10 to August 10.

Price of Trees, 20 cents each; \$2.00 per dozen; \$10.00 per 100; \$75.00 per 1,000.

KEIFFER PEAR.

Seedling of Chinese Sand Pear; supposed to have been crossed with Bartlett; fruit large, skin yellow, with red cheek; flesh firm and well flavored; excellent for cooking; tree vigorous grower; ripe September 1 to October 1.

Price of Trees, 20 cents each; \$2.00 per dozen; \$10.00 per 100;
\$75.00 per 1,000.

DELAWARE GRAPE.

NATIVE GRAPES

LIST OF SELECT VARIETIES.

PRICE, unless otherwise noted, 20 cents each; \$2.00 per dozen;
\$10.00 per 100; \$50.00 per 1,000.

HARTFORD PROLIFIC—Bunches large and rather compact; berries large, globular, skin thick, black, covered with bloom; flesh sweet and moderately juicy; ripe June 25.

IVES—Bunches above medium, compact berries, large, skin thick and black; flesh pulpy, sweet, little too harsh for table use; ripe June 25. Price, \$20.00 per 1,000.

MARTHA—Bunches medium, rather close, berries large, skin greenish yellow with bloom; flesh juicy and sweet; ripe July 10.

CONCORD—Bunches large, compact, berries large, almost black, with much blue bloom; skin rather thick; flesh juicy and sweet; a very popular market variety; ripe July 15. Price, \$20.00 per 1,000.

DELAWARE—Bunches medium compact, berries small, skin thin, pale delicate red; flesh juicy, vinous and sweet; this is one of the very finest table grapes raised; ripe July 15.

NIAGARA—Bunches large and compact, berries large, skin greenish yellow with bloom; flesh juicy and sweet; a vigorous grower and very prolific; one of the best white grapes for this section; ripe July 15.

CATAWBA—Bunches medium, berries large, skin pale red with bloom; flesh juicy, with a pleasant musky flavor; ripe July 15.

WARREN—Bunches large, compact; berries small, skin black with blue bloom; flesh juicy, sweet, aromatic, vinous, rich; ripe Aug. 15.

NORTON'S VIRGINIA—Bunches medium, compact; berries small, skin black, rather thin; flesh vinous, sweet, juicy, and is very much praised as a wine grape; ripe September 1.

MUSCADINE TYPE.

THOMAS—Berries large, skin transparent, violet color, sweet, vinous, pulp tender; superior in quality to any other type; ripe August 15.

SCUPERNONG—Bunches small, seldom more than eight or ten berries; very large and round, skin thick, of bronze color when fully ripe; flesh pulpy, juicy, sweet, vinous and very refreshing; free from rot; very prolific; a rapid grower and splendid wine grape; ripe September 1.

FLOWERS—Bunches medium, of from fifteen to twenty-five berries, skin dark black; flesh vinous and sweet; ripe October 10.

JAPANESE PLUMS

These "Oriental" Plums, introduced about ten years ago, are rapidly gaining in popular favor, in fact have almost supplanted native kinds in the South. Some varieties of this class are very vigorous and productive, yielding almost yearly abundant crops of large, well flavored and attractive fruit; they are also less susceptible of Spring frosts than peaches, which makes them very desirable for commercial orchards. Some of our largest peach and plum growers here shipped them in car load lots this season, while the same parties did not ship a crate of peaches, the latter having all been killed by cold.

In planting for profit where the greater portion of our fruits must go to distant markets, keeping qualities are especially important. A large per cent. of these plums will ripen up well if picked just as they begin to color red and will keep from one to two weeks.

We consider the following select list of five varieties, ripening in succession from June 5 to August 5, the most desirable tested here.

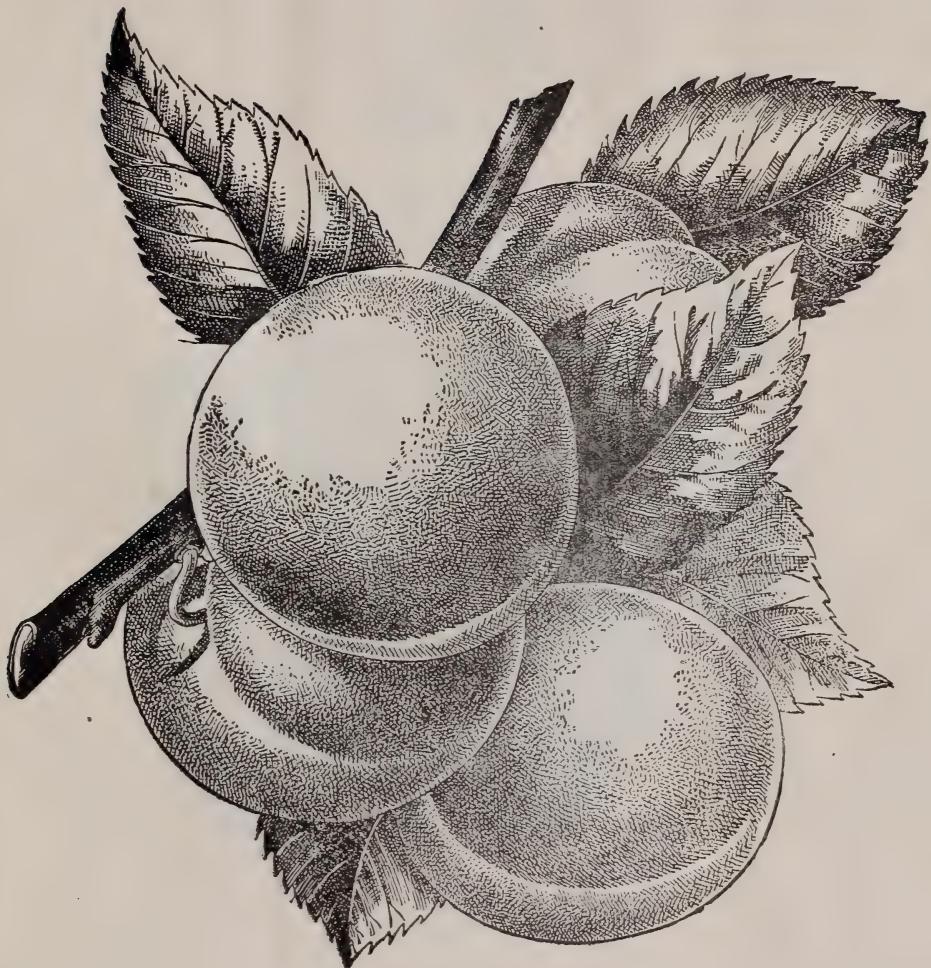

Prices of Trees on Mariana Plum Stock.

One to two year old trees, 5 to 7 feet high, 20 cents each ; \$2.00 per doz. ;
\$10.00 per 100 ; \$50.00 per 1,000.

One to two year old trees, 4 to 5 feet high, 15 cents each ; \$1.50 per doz. ;
\$7.50 per 100 ; \$40.00 per 1,000.

One to two year old trees, 3 to 4 feet high, 10 cents each ; \$1.00 per doz. ;
\$6.00 per 100 ; \$30.00 per 1,000.

REG NAGATE—Fruit medium to large; skin deep vermillion red, with white bloom; flesh light yellow, very firm, juicy and of good quantity. Tree vigorous, upright grower; very prolific after it attains the age of three to five years. A very desirable market variety; ripe June 5 to 15.

**ABUNDANCE PLUM.**

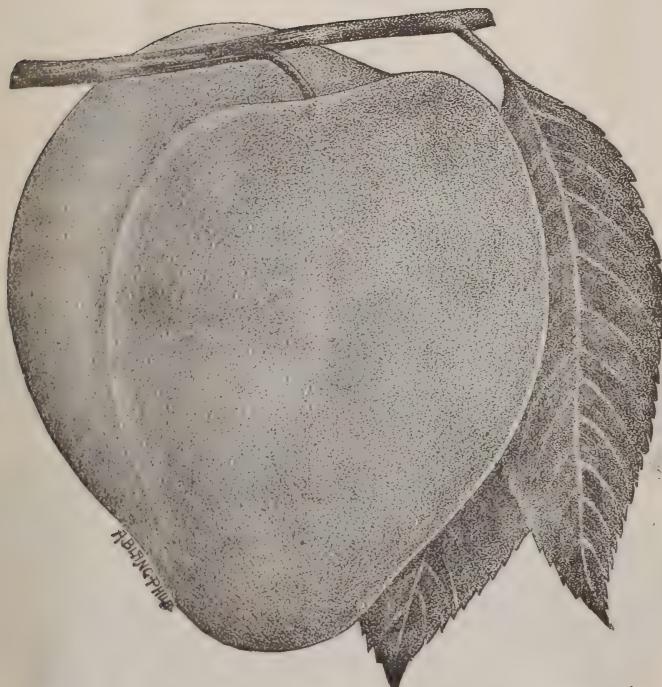

ABUNDANCE—(Yellow Flesh Botan)—Fruit very large, skin yellow, shaded with a rich cherry red, covered with a decided white bloom, which makes it very attractive indeed; flesh yellow, firm, rich, juicy and sweet—a most delicious flavored fruit, very fragrant; tree a vigorous, upright grower, very handsome in appearance, early and profuse bearer; the most profitable market plum now grown in the South; ripe June 10 to 20.

PLUMS

BURBANK—Fruit very large; skin yellow, almost covered with a crimson purple; flesh yellow, very firm and sweet. Tree very vigorous and spreading grower, hardy and very productive. One of the very best keeping varieties grown here; specimens picked here this season, June 26, and placed in closed room were apparently sound August 1, although they suffered in quality from such treatment; ripe June 25 to July 10.

PLUMS

WICKSON PLUM.

WICKSON—Fruit remarkably large and very handsome; skin crimson purple; flesh yellow, very firm, juicy and highly flavored; pit very small; tree vigorous, upright grower; ripe August 1 to 10.

HALE—Fruit large; skin orange, thinly covered with red; flesh yellow, quite juicy, with a delicious peach flavor, considered the best flavored of all the Japan plums. Good bearer, by far the strongest growing plum we have ever propagated; have had them grow 10 feet high in nursery rows first year; ripe August 5 to 15.

MULBERRIES

PRICE, 25 cents each ; \$2.00 per dozen ; \$15.00 per 100 ;
\$100.00 per 1000.

HICK'S EVER-BEARING MULBERRY.

DOWNING'S EVER-BEARING—Flesh rich, sub-acid; a good bearer and rapid grower; ripe May to July.

HICK'S EVER-BEARING—Flesh sweet, insipid, fine grower, bear large crops, four crops in the year; excellent variety for pigs and poultry.

WHITE—Medium; flesh insipid, a rapid grower and prolific bearer.

FIGS

PRICE, 25 cents each ; \$2.00 per dozen ; \$12.00 per 100
\$100.00 per 1000.

BROWN TURKEY—Large, oblong, skin dark brown, covered with a blue bloom ; flesh red and of very fine flavor.

BRUNSWICK—Very large, skin violet ; flesh reddish brown, rich, excellent.

CELESTIAL—Small, skin pale violet, with a bloom ; flesh very sweet ; very prolific and hardy variety ; tree a very rapid grower.

LEMON—Large size, skin with lemon color ; flesh sweet and very good.

STRAWBERRIES

PRICE, 75 cents per 100; \$5.00 per 1000. Lots of 10,000, \$30.00, and lots of 100,000, \$200.00.

WILSON'S ALBANY—Very large, color deep crimson; flesh crimson, firm and rich; a most prolific bearer and vigorous grower; stands firm as a home market berry.

SHARPLESS—Very large, form irregular, bright scarlet; flesh pale red; very firm, sweet, rich and juicy; a good market variety.

HOFFMAN—Large, oblong, color deep scarlet; flesh firm and well flavored; early and popular berry for home and market use.

MICHEL—Large, very early, a popular and profitable market berry for this section.

NEWNAN—Berries large, perfect shape, good color, firm and well flavored; a good early berry.

LADY THOMPSON—Very large and quite uniform in size, color crimson; flesh very firm and sweet; stands shipment well, which makes it a very profitable market berry.

RASPBERRIES

BLANC PHILT.

PRICE, 50 cents per dozen; \$3.00 per 100; \$15.00 per 1000.

CUTHBERT—Fruit medium to large, roundish, color crimson; flesh very firm, juicy and sweet; canes very strong; a vigorous and upright grower, profuse bearer; the fruit stands transportation remarkably well, and is one of the most profitable market berries.

GREGG'S—Fruit very large, roundish, oblate, color black, with some bloom; flesh firm, sweet and rich; canes strong and vigorous; good bearer and popular market variety.

MARIANNA PLUM.

Suitable for grafting and budding stocks, one year old, well rooted, with tops cut off above ground. Price \$1.00 per 100; \$5.00 per 1000.

PEACH SEEDLINGS.

No. 1. Suitable for grafting stocks, at \$1.00 per 100; \$5.00 per 1000.

No. 2. Small size, suitable for transplanting and June budding, at 50 cents per 100; \$2.50 per 1000.

BUDS.

APPLES—Leading varieties, 50 cts. per 100; \$2 per 1000; \$15 per 10,000.

PEACHES—Leading varieties, 50 cts. per 100; \$2 per 1000; \$15 per 10,000.

PLUMS—Wild Goose, 50 cts. per 100; \$2 per 1000; \$15 per 10,000.

PEARS—LeConte and Keiffer, \$1 per 100; \$4 per 1000; \$30 per 10,000.

SCIONS FOR GRAFTING.

APPLES—Leading varieties, 50 cts. per 100; \$2 per 1000; \$15 per 10,000.

PEACHES—Leading varieties, 50 cts. per 100; \$2 per 1000; \$15 per 10,000.

PLUMS—Wild Goose, 50 cts. per 100; \$2 per 1000; \$15 per 10,000.

PEARS—LeConte and Keiffer, \$1 per 100; \$4 per 1000; \$30 per 10,000.

CUTTINGS.

PEARS—LeConte, 10 to 12 inches long, at \$1 per 100 ; \$5 per 1000 ; \$40 per 10,000.

PLUMS—Wild Goose, 10 to 12 inches long, at \$1 per 100 ; \$5 per 1000 ; \$40 per 10,000.

PLUMS—Marianna, 6 to 8 inches long, 50 cts. per 100 ; \$2 per 1000 ; \$15 per 10,000 ; and lots of 50,000 and over at \$1 per 1000.

BLACKBERRIES

Price of Plants, 50 cts. per dozen ; \$3.00 per 100 ; \$15.00 per 1000.

EARLY HARVEST—Fruit medium size; flesh very firm, sweet and well flavored; a vigorous upright grower, early and remarkably productive; the most profitable market variety for this section; ripe May 10 to June 10.

EARLY HARVEST.
